AsgardMobile v2.29.0 / Desktop Application v2.29.0

Desktop Application

Application Maintenance & Optimization

The focus for this publish was backend maintenance and optimization to Asgard Canned Reports. This will be an ongoing effort as each report is processed throughout the system.

Updated reports will now include all Report Parameters/Configuration settings directly on the preview screen. Users will need to set the parameters to their specification and click “Submit” to generate the report.

Work Order Search, Advanced Filtering for Types

Users can now easily select/deselect Work Order Types for all search screens by using the All/None buttons. They can also perform advance filtering by clicking the down arrow.

General Maintenance & Performance

We made various enhancements and fixes in several system areas, including issues identified in user reports, automated reporting, and performance records/logs.

Specific Issues Resolved:

- Fixed Error Saving Welcome Tools
- Fixed Error When Resolving Incidents
- Fix to Avg. Response Time Report, Negative Assignment Times

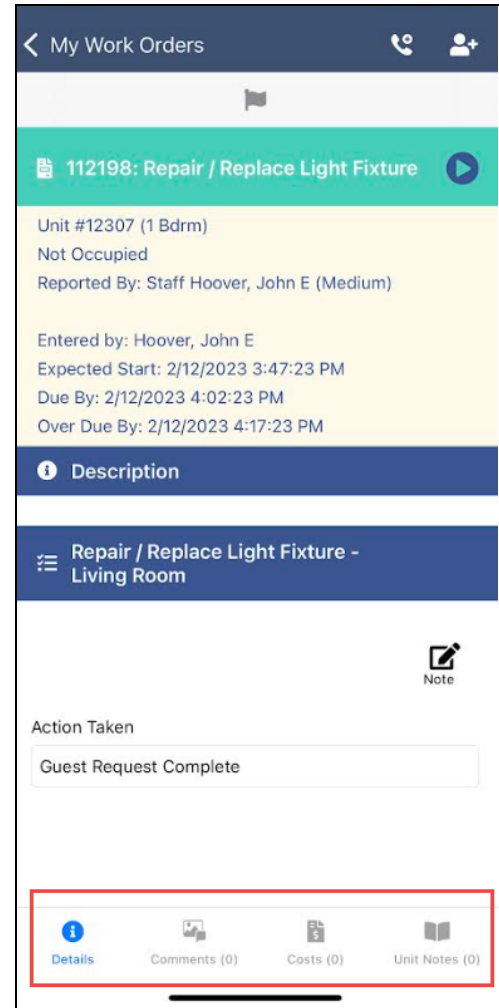

Mobile Application

Maintenance, Styling, and Performance

We are continuously enhancing the application to support your team's success and make the app more user-friendly. In this publish, you will find the following enhancements:

- Text and Icon standardization throughout the App

Note: As with all Asgard updates, we will continue to support the current version and one prior. We strongly encourage all users to update ASAP to take advantage of these new features.

We would love to hear what you think of these new features. Please contact support@katanasoft.com with questions, concerns, or further feedback/enhancement ideas!
