Asgard Desktop
# Change Your Language Settings

Asgard Learning Portal

In the Asgard Desktop Application, you can change the Language Settings for your own profile or for another team member if you have the appropriate permissions. If you do not have Grant Privileges permissions and think you should, please contact us at support@asgardsoftware.com.
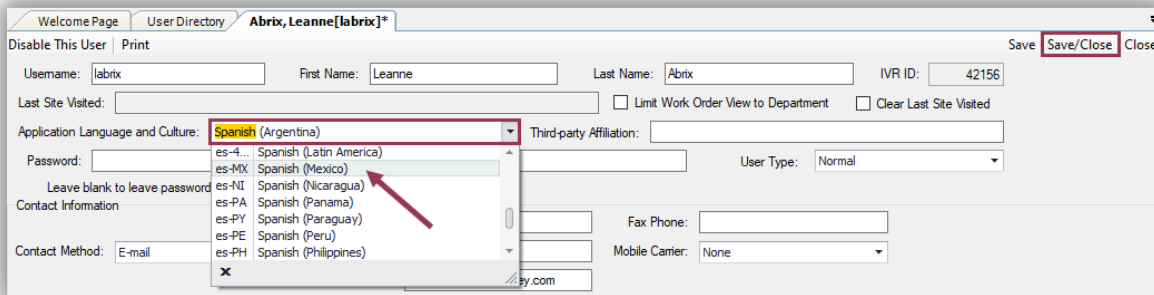

Step 1: Click **Directory** on the upper left-hand side of the screen.

Step 2: On the **User Directory** screen, highlight your name or a team member's name, and click **Edit**.

Step 3: In the user's profile, click on the **Application Language and Culture** field. Begin typing the desired language, scroll through the options, select the appropriate one, and click **Save/Close.**

Step 4: The user will need to log out and log back in for the updated language setting to take effect on their desktop and mobile applications.

¡Ahora sus aplicaciones están en español!
