

We provide access to your Organizations Training Site, allowing users to build proficiency in Asgard before handling real data.

Step 1: To change sites in Asgard, select **File**, then select **Change Site**.

Step 2: To practice in the training site, select your organization's training site and click **OK**.

Step 3: To return to the Main Site, go again to **File** and select your site's name. Asgard conveniently stores the sites you've previously accessed, making it quick and easy to switch back.

DONT FORGET !

Remember to change back to your main site, as the training site does not handle real data and is only used for training purposes.
