

**Step 1:** Locate and tap the **App Store** icon on your device's home screen.

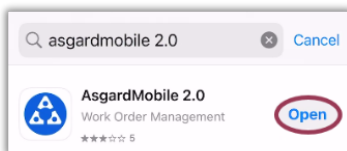

**Step 2:** In the search bar, type **AsgardMobile 2.0**.

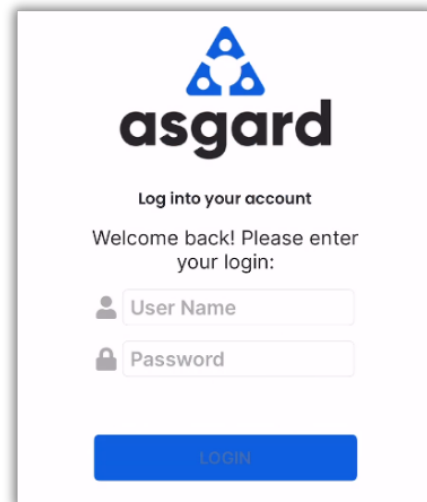

**Step 3:** Tap **AsgardMobile 2.0** app name in the search results. Tap **Get** (or the **Cloud Icon** if previously downloaded).

**Step 4:** Tap **Open** once installed or locate it on your home screen.

**Step 5: Login** by entering your Asgard credentials provided by your organization.

**!** Turn Automatic App Downloads to ON. This will ensure the latest version of Asgard Mobile is updated automatically.

For best results, ensure the following settings are configured on each device:

- Turn Notifications to **Allow** or **ON**.
- Set the **Volume** to high to hear notifications in locations with ambient noise (e.g., pools).
- **Allow access to:** **Camera**  
**Photos**  
**Photo Library**  
**Microphone**

If you can't access these settings, please contact your IT team for assistance.

Please note: We only support the current version of AsgardMobile and one prior version. For best results, be sure to update to the latest version with each publish.
