

Etap 1: Tape sou **Dispatcher** nan ekran prensipal la.

Après sa, peze sou Ikòn **Filtre** a pou louvri ekran Filtraj la.

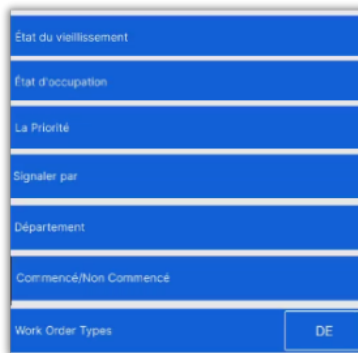

Etap 2: Chwazi paramèt filtraj ou vle yo lè ou antre:

- Kote
- Responsab
- Non lòd travay la

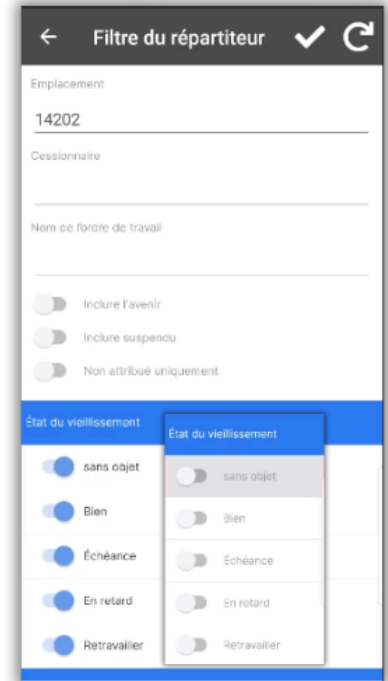

Chanje pou enkli:

- Lòd Travay ki gen pou fèt
- Lòd Travay ki sispann
- Sèlman Lòd Travay ki pa gen Responsab

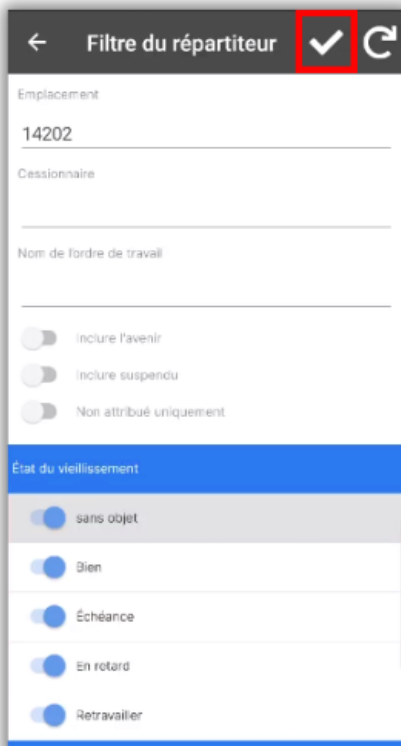

Desann pou filtre pa:

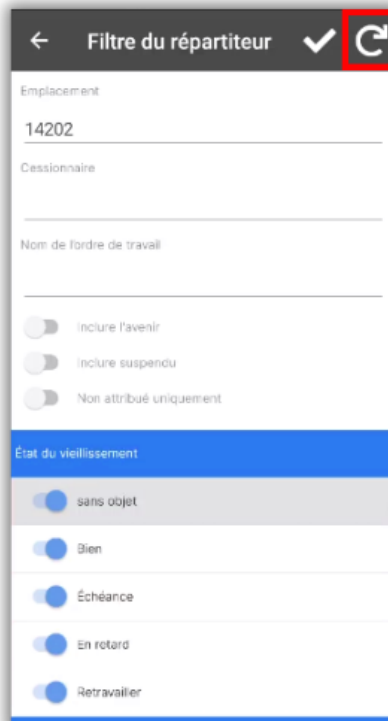

Tape sou tit banyè a pou chwazi/degage tout

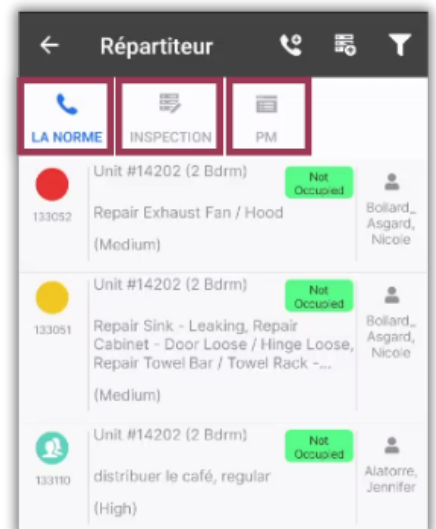

Etap 3: Tape sou siy **verifikasyon** an pou aplike filtè yo.

ENPÒTAN: Filtè yo ap rete aktif jiskaske ou **reinitializè** yo manuellement.

Etap 4: Kounye a, ekran dispatche a montre sèlman travay ou chwazi yo.

Enpòtan pou sonje: Filtè ou chwazi yo ap afekte tout **trava** ekran Lòd Travay yo.
